

# Economics

## Higher Education at BHASVIC 2019

In Sept 2019, 63 BHASVIC students went onto study Economics at 30 different universities

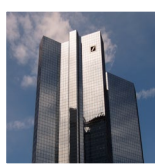

Economics remains year on year one of our **top ten** subjects for University study.

You can study a **BSc Economics (with maths)** or **BA Economics (without maths)**

### Should I study Economics at degree level?

Economics is the study of people's behaviour & how decisions influence the well-being of society. We explore themes such as inequality, economic growth and sustainable development.

Split fairly evenly between lectures, seminars, workshops and private study. Principles, maths and stats will ensure foundations are set for first year modules. Projects & essays are required.

#### Types of degree

- You can choose to study straight economics or a combined subject
- Often combines well with Business
- Finance
- Also Philosophy
- The combinations are extremely varied

#### Entry Requirements

- A-levels (or equivalent) usually required
- Maths
- (If you study a BA Economics you will not usually require A level Maths)
- Useful to have
  - Economics
  - Further maths
  - Statistics

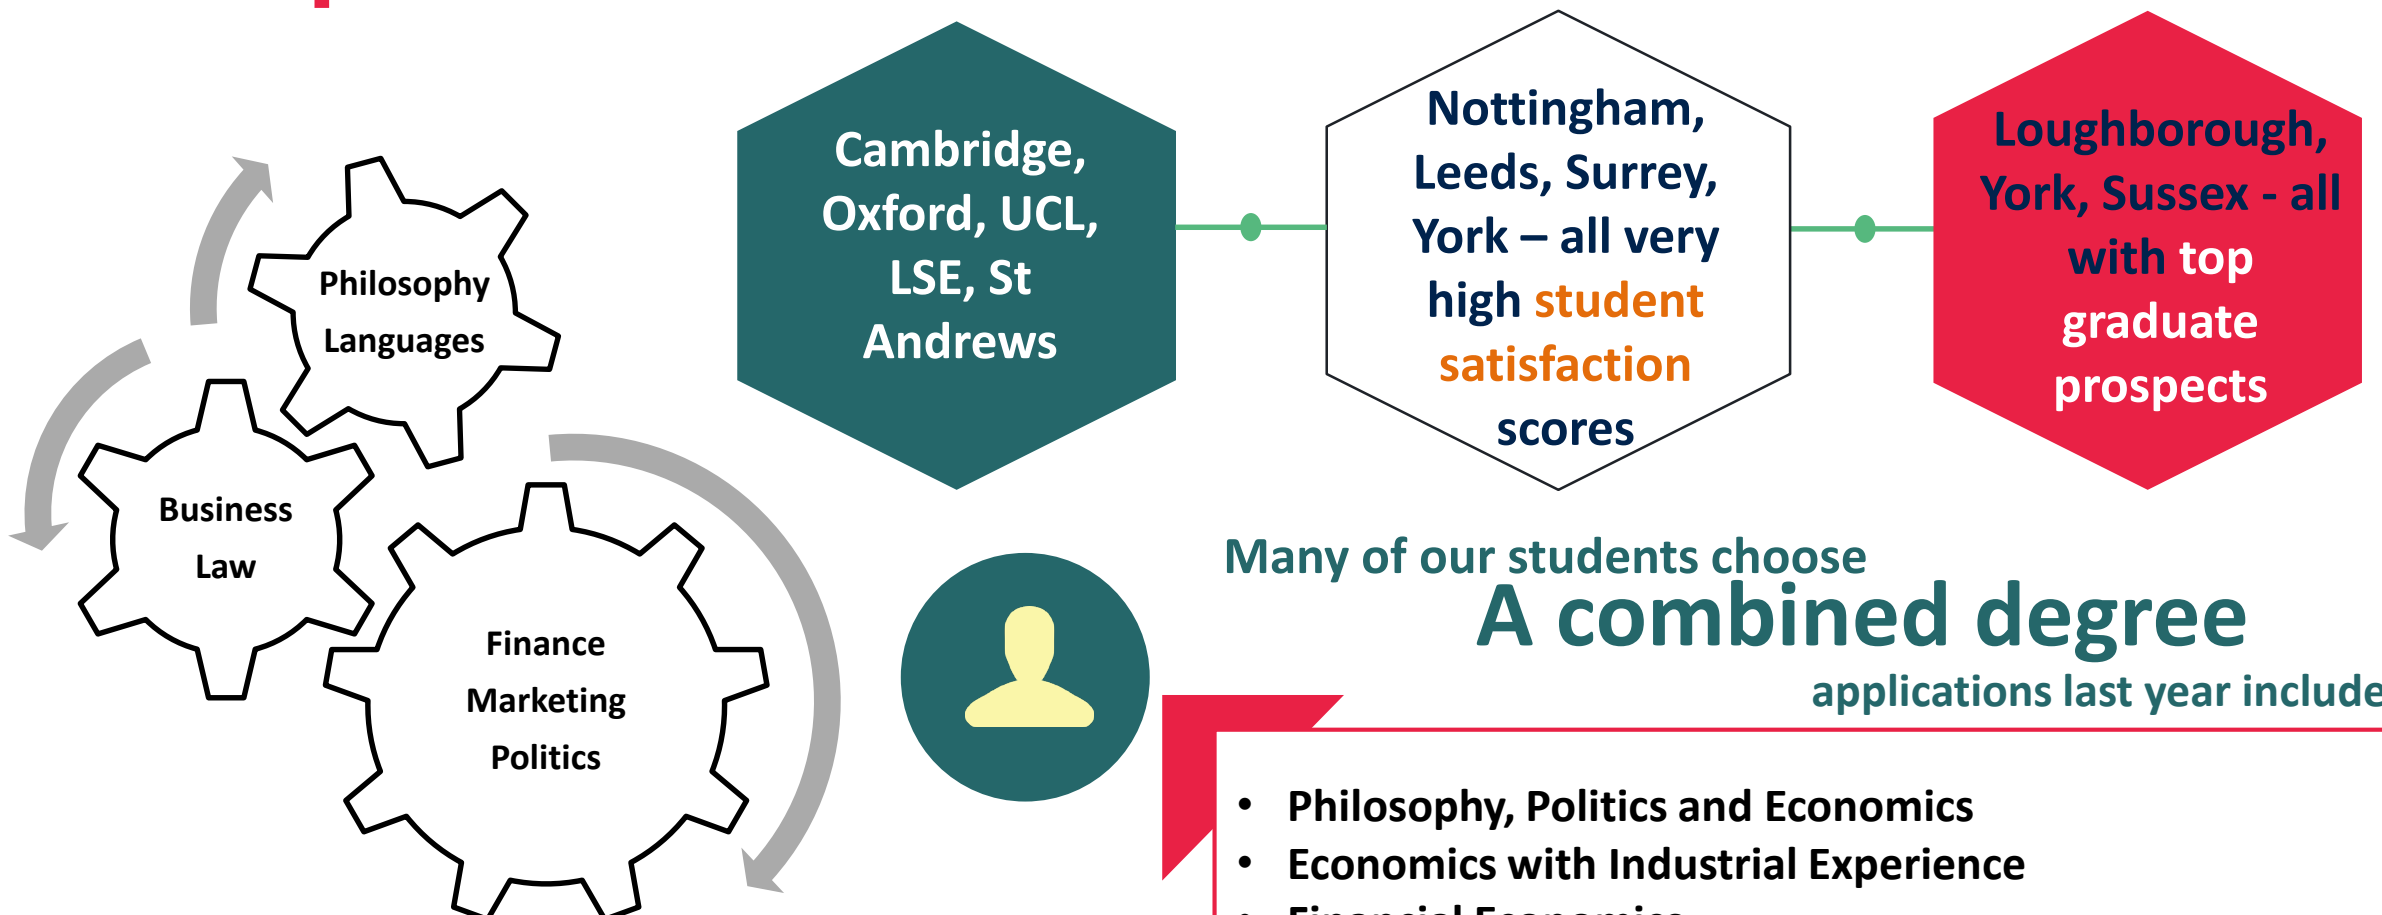

#### Example modules

- Mathematics for economists
- Microeconomic theory
- International trade
- Economics principles
- Econometrics
- Money and banking
- Economic history
- Managerial and industrial economics
- Legal studies
- Principles of marketing and strategy

### Top 10 Universities for Economics

Complete University Guide 2020
